

**Meeting Date:** November 17, 2017

**Agenda Item No. 11**

**Agenda Item:** Informational Item on new iWILDS system    **Bureau Chief Approval:** \_\_\_\_\_

**Prepared by:** Michael Pearson, Chief, Bureau of Administration

**Background:**

The current contract for the department's licensing system was awarded in 2006 and expires on February 28, 2018. In preparation, the department issued an RFP for a new license system vendor, and JMT of Maryland was awarded the contract in April of 2017. Since that time, both JMT and department licensing staff have been working together to develop and configure the new system in time for a March 2018 go-live.

Mr. Jeff Roberts, vice-president of JMT and the project manager, will be on site to give a brief presentation and demonstration of the new Point-of-Sale (POS) terminal and system.

**Statutory Authority and/or Policy Issues:**

I.C. 36-301 (a) 1. gives the Commission the authority to prescribe by rule the procedures for issuance of licenses and applications by a computerized licensing system.

Also, SB 1344 revised provisions of Idaho Code to have an independent entity carry out drawings for tags for controlled hunts as established by the Commission, and require IDFG to solicit bids for the contract pursuant to Idaho Code. This RFP includes the requirement to provide a draw module and complies with SB 1344.
