

Nonresident General Season Deer & Elk Tag Draw Odds Description

2026 Elk, 1st application period:

- All nonresident elk tags were drawn in the first application period.
- Nonresident elk tags are limited to a statewide total of 12,815 tags per year, including outfitter allocated tags. Outfitter allocated tags are not shown in the tables below.
- Overall, 32.15% of applicants were successfully drawn. Note that drawing results for an individual elk zone will vary and the percentage of success per zone was calculated by dividing the number of tags by the number of applicants within that single zone.
- All elk tags drawn were drawn from an applicant's 1st or 2nd hunt choice. All tags were awarded before any tags were issued for 3rd, 4th, or 5th hunt choices.
- DAV Elk tags, shown in Table 2 below, are limited to a total of 300 tags per year. Overall, 10.16% of DAV Elk applicants were successful. Note that DAV Elk tags do not have a limit per zone when issued via the Nonresident Draw (uncapped elk zones), so there is no zone specific percent success.

Total Number of Tags Available	300
Total Number of Applicants	2,953
Tags Drawn	300
% Successful	10.16%

Table 2.

2026 Regular and White-Tailed Deer:

- All nonresident regular and white-tailed deer tags were drawn in the first application period.
- Overall, 53.72% of regular and white-tailed deer tag applicants were successfully drawn. Note that the drawing results for an individual Game Management Unit (GMU) will vary and the percentage of success per GMU was calculated by dividing the number of tags by the number of applicants within a single GMU.
- Nonresident regular and white-tailed deer tags are limited to combined statewide total of 15,500 tags, including outfitter allocated tags. Outfitter allocated tags are not shown in the tables below.
- Nonresident regular and white-tailed deer tags are also limited by GMU. The sum of available tags across all GMU's exceeds the statewide limit of tags, which leads to the statewide limit being met before all GMU quotas are met. In Table 3 and 4 below, GMU's that show a lower number drawn than tags available could indicate that the statewide limit of tags was reached before the GMU quota was met.
- All regular and white-tailed deer tags were drawn from an applicant's 1st, 2nd, or 3rd choice. All tags were awarded before any tags were issued for 4th or 5th hunt choices.
- DAV regular and white-tailed deer tags, shown in table 5 below, are limited to 500 tags per year. Overall, 17.56% of DAV regular and white-tailed deer tag applicants were successful. DAV regular and white-tailed deer tags are valid statewide, so there is no GMU specific percent success.
