“Possession limit” shall apply to salmon while in the field or being transported to the final place of consumption or storage.

Anglers must cease fishing for all Chinook Salmon (including jacks) once they have retained their daily or possession limit of adult Chinook Salmon.

### Releasing Fish

Any salmon that is landed but not reduced to possession must be released. Anglers should strive to minimize handling and stress on each fish caught and released.

## Methods of Take

**Barbless Hook**

Up to 3 points  
on one shank.

**Single-Pointed Hook**  
One point on one shank

Barbless hook

- A** It is unlawful to use any hook larger than 5/8 inch measured from the point of the hook to the shank.
- B** Only barbless hooks may be used when fishing for salmon. Bending the barb(s) down to the shank of a single, double, or treble hook will meet this requirement.

## Harvest Rules

- A** Adult and jack Chinook Salmon may be kept if the adipose fin has been clipped as evidenced by a healed scar.

- B** Adult and jack Chinook Salmon with an unclipped adipose fin may be kept.

- C** No person shall have in the field or in transit an adult anadromous salmon that has been processed by removing the head and tail unless the following conditions are met:
  1. The fish has been recorded on the taker's salmon permit;
  2. the fish is processed and packaged with the skin naturally attached to the flesh including a portion with a healed, clipped, adipose fin scar or the adipose fin; and
  3. it must be packaged in a manner that the number of fish harvested can be readily determined. No person shall process salmon until they are ashore and done fishing for the day. No person shall transport processed salmon via boat. Jack salmon may not be processed while in the field or in transit. Any processed salmon count towards an angler's possession limit while in the field or in transit
- D** All salmon that are hooked, landed and reduced to possession must be killed immediately after landing and shall be counted in the limits of the person hooking the fish.

## Permit Validation

When an adult Chinook Salmon has been hooked, landed and reduced to possession, the angler hooking the fish must immediately:

- A** Cut out and completely remove one numbered notch from his or her permit; and
- B** look up the location code number from the list below and write it in the space provided; and
- C** enter in the space provided, the month and day fish was harvested.

**Note:**

- When a salmon is released unharmed, as in catch-and-release fishing, the angler is not required to make an entry on the permit.
- Anglers may retain jack salmon less than 24 inches in length as part of their bag and possession limit but they are not required to record them on their permit.

*For example, a salmon equal to or greater than 24 inches in length kept from the Clearwater River below Memorial Bridge on September 6 would be entered as:*

FISH BIRD	MONTH DAY		LOCATION CODE	MONTH DAY		LOCATION CODE	FISH BIRD
1	9	06	03				21
