B
dow are several terms, rules, and definitions used in this
booklet. Please consult the Idaho Administrative Procedures
Act webpage or Title 36 of the Idaho Code for more detail at
http://adminrules.idaho.gov/rules/current/13/index.html or

Methods of Fishing and Equipment

Archery and Spear Fishing: Fishing with a bow and arrow, crossbow, spear or mechanical device, excluding firearms. This
type of fishing is permitted only in the taking of bullfrogs and
unprotected nongame fish and only in those waters during the
season set for the taking of game fish.

Artificial Fly: Any fly made entirely of rubber, wood, metal,
glass, feather, fiber or plastic by the method known as fly tying.

Artificial Lure: Any device made entirely of rubber, wood,
motor, glass, feather, fiber, or plastic with hook or hooks
attached. Bait of any kind may not be used with artificial lures
when fishing artificial flies and lures-only waters.

Attention of Fishing Gear: You must attend to your
fishing gear while fishing. This means being able to watch your
rod at all times and be able to react to a potential strike.

Bait: Organic substances, other than rubber, wood feather, fiber,
or plastic, attached to a hook to attract fish. Bait includes insects,
insect larvae, worms, dead fish, fish parts, any other animal or
vegetable matter, or scented synthetic materials.

Note: Use of live fish, leeches, frogs, salamanders, waterdogs or
shrimp as bait is prohibited in Idaho, except that live crayfish
may be used if caught on the body of water being fished.

Bait Fishing: Fishing with any organic substance defined as
“bait.”

Barbless Hook: A fish hook without barbs or on which barbs
have been bent completely closed (point of barbed area touches
the body of the hook).

Catch-and-Release Fishing: Effort, by permitted methods,
to catch or attempt to catch a fish or species of fish is legal, with
the restriction that any fish or species of fish so caught must be
released immediately, unharmed back to the water. Catch-and-
release fishing is only allowed when a fishing season is open for
that particular fish species. No released fish can be marked by
any means including tags, fin clips, or injuring with an intent to
leave a scar. Note: Species of fish not specifically listed as catch-
and-release may be harvested under their appropriate limits.

Chumming: The use of any substance not attached to a hook
that is intended to attract fish. It is illegal to chum while fishing
in Idaho.

Closed to Fishing: No fishing of any type is allowed in the
water body.

Disturbing Traps or Fishing Gear Belonging to Others:
It is illegal to destroy, disturb, or remove any traps belonging to
others.

Electric Motor Only: When fishing waters listed “electric
motors only,” gas (internal combustion) motors may be attached
to the boat; but use of the gas motor is prohibited.

Fishing: Any effort made to take, kill, injure, capture, or catch
any fish, crayfish, or bullfrog. All fishing in Idaho requires a valid
fishing license except fishing in a private pond where the owner
has a valid Private Pond Permit from Fish and Game.

Fishing Gear: It is unlawful to fish in any waters of Idaho with
more than one (1) handline or pole with a line attached, except
a person with a two (2) pole permit may use two (2) poles; or
with more than five (5) lines while ice fishing; or by archery,
spearfishing, snagging, hands, and netting except as permitted.
Not more than five (5) hooks may be attached per line. The line
or lines must be attended by the person fishing. In conjunction
with the Angler Incentive Program, unlimited poles and lines
may be used while fishing from a boat on Lake Pend Oreille. A
sliding sinker must be used when fishing for sturgeon.

Fishing License: You must have in your possession a valid
fishing license to fish in Idaho. You must produce your license or
fish upon request of an agent of the Idaho Department of Fish
and Game.

Fishing Shelter: Any enclosure or shelter used for fishing. If
left unattended overnight on the ice of any water statewide, it
shall have the owners’ name, telephone number, and current
address legibly marked on two opposing sides of the enclosure or
shelter.

Fly-Fishing: Fishing with a fly rod, fly reel, fly line, and
artificial flies.

Float Tube: A floating device which suspends a single
occupant, from the seat down, in the water, and is not propelled
by oars, paddles or motor.

Gaff Hook: A pointed device designed to pierce a fish for the
purpose of reducing the fish to possession. It is illegal to land
fish of any species with a gaff hook except through a hole cut or
broken in the ice in waters which have no length restrictions or
harvest closures for that species or when landing non-game fish
taken with archery equipment.

Hands, Use of for Fishing: The only fish you can legally catch
and harvest using your hands are crayfish and bullfrogs. You
must use fishing gear to harvest all other fish species.

Hook: A bent wire device, for the catching of fish, to which
one, two, or three points may be attached to a single shank. Up
to five (5) hooks per line may be used, except where specifically
prohibited. When fishing for salmon or steelhead, the gap
between the point and shank cannot be greater than 5/8 inch. A
single-pointed hook has one shank and one point.

Ice Fishing: Fishing through an opening, broken or cut,
through the ice. You may fish with a maximum of five (5) lines
per angler. The opening in the ice may not exceed 10 inches in
Two-Pole Permit: A person who has a valid resident or nonresident fishing license may purchase a two-pole permit. This permit authorizes the license holder to use two poles or rods at the same time on waters and during seasons specified by Commission Rule. Valid for all open water and salmon and steelhead fishing.

Watercraft: Those devices designed as a means of transportation on water.

Fish Terms and Limits

Bag Limit: The maximum number of fish that may be legally harvested by any one person in one day. The term “bag limit” shall be construed to be an individual, independent effort and shall not be interpreted in any manner as to allow one individual to harvest more fish than their “bag limit” or help the “bag limit” of another.

It is illegal to fish in waters having special bag or species limits while in possession of fish in excess of those limits.

Clipped Adipose Fin: See diagram page 45. The adipose fin must be missing or nearly missing with a healed scar where the adipose fin is supposed to be located.

Game Fish: Brook, Brown, Bull, Cutthroat, Golden, Lake (Mackinaw), Rainbow (including Steelhead), Splake and Sunapee Trout; trout hybrids (e.g. Tiger Trout); Atlantic, Chinook, Coho, Kokanee, and Sockeye Salmon; Arctic Grayling; Whitefish; Cisco; Crappie; Perch; Bass; Catfish; Bullhead; Sunfish; White Sturgeon; Northern Pike; Tiger Muskie; Walleye and Sauger; and Burbot (Ling). Crayfish are also defined as game fish.

General Rules: The seasons, gear, and bag limits adopted for the region where you are fishing.

Harvest: Reduce a fish to possession.

Hybrid Fish: The offspring of two different species.

Limit is 0: Catch-and-release fishing is allowed but the fish species listed in the rule must be released after landing and may not be reduced to possession.

Nongame Fish: Any fish not specifically defined as a “game fish.” Protected nongame fish are Bear Lake, Shoshone and Wood River Sculpin; Sand Roller, Northern Leatherside Chub, Bluehead Sucker (also referred to as Green Sucker), and Pacific lamprey.

Possession Limit: Maximum number of fish that may be lawfully in possession of any person. Possession limit shall apply to fish while in the field or being transported. All fish hooked, landed and not immediately released shall be counted in the possession limit of the person hooking the fish. The possession limit is 3-times the daily bag limit after the second day of the season.

Salmon, Chinook: Anadromous (ocean-run) salmon of the species Oncorhynchus tshawytscha in the Snake River drainage below Hells Canyon Dam, the Salmon River drainage, and the Clearwater drainage (excluding lakes, reservoirs and the North...
Fork of the Clearwater River above Dworshak Dam), and the Boise River, when stocked.

**Salmon, Coho:** Anadromous (ocean run) salmon of the species Oncorhynchus kisutch in the Snake River drainage below Hells Canyon Dam, the Salmon River drainage, and Clearwater River drainage (excluding lakes, reservoirs and the North Fork of the Clearwater River above Dworshak Dam).

**Season Limit:** The maximum number of fish that may be legally taken in any declared season.

**Special Rule Waters:** Any water with a gear, season, or bag limit rule that is different from the general rule.

**Steelhead:** Rainbow trout longer than 20 inches in length in the Snake River drainage below Hells Canyon Dam, the Salmon River drainage (excluding lakes and the Lemhi and Pahsimeroi rivers), and the Clearwater river drainage (excluding that portion above Dworshak Dam, and lakes). Rainbow trout longer than 20 inches in length with a clipped adipose fin (as evidenced by a healed scar) are defined as steelhead in the Snake River from Hells Canyon Dam upstream to Oxbow Dam, and in the Boise River from its mouth upstream to Barber Dam.

**Total Fish Length:** The length as measured from the tip of the snout to the end of the tail.

---

**Boundary and Water Definitions**

**Confluence of a River or Stream:** The point where two rivers or streams come together.

**Diversion:** A man-made structure designed to change the direction of flowing water in a stream.

**Diversion Pond:** A man-made pond holding water taken from a stream or reservoir. The diversion pond may be connected to the stream or reservoir by an open ditch or pipe.

**Drainage:** All water flowing into a common river or stream system, either above or below ground, due to area geography.

**Fish Trap:** Any man-made structure designed to capture fish.

**Fish Weir:** Any man-made structure placed in a water body to delay or divert migrating fish.

**Flat Water:** Water where there is no observable direction of flow.

**Milepost:** An official state highway marker which denotes a mile location. Milepost markers are typically found at one-mile intervals on Idaho highways.

**Mouth of a River or Stream:** The place where a river or stream enters a larger body of water.

**Private Pond:** A man-made, off-channel pond on private property. The owner may only stock the pond with fish after obtaining a private Pond Permit from Fish and Game.

**Reservoir:** The flat water level existing at any time within a reservoir basin. Unless noted otherwise, a stream flowing through the drawn down portion of a reservoir is not considered part of the reservoir.

**Section:** An area of river, stream, or reservoir between specific boundary locations.

**Tributary:** A stream flowing into a larger stream or lake.

**Upstream:** Moving from a lower elevation point in a stream towards a higher elevation point in the same stream.

---

**Tournament/Fishing Contests**

An organized event based on the capture of individual fish where there is: a) a live fish weigh-in; or b) awards cash or prizes valued at $1,000 or more based on number, size or species of fish captured; or c) is expected to draw 20 or more anglers. Contests for participants under the age of 14 are exempt. Any person, organization, club, business, partnership, corporation or other entity that sponsors a fishing contest must first obtain a fishing contest permit from IDFG. No harvest tournaments on native fish will be allowed. Applications can be obtained at any IDFG Office or from our website at idfg.idaho.gov/fish/tournaments. Allow a minimum of 30 days for processing.

---

**Transport, Release, and Possession of Fish**

**Check Stations:** If you have been hunting or fishing or have in possession game or nongame fish, you are required to stop at a check station established to inspect fish, game, or licenses.

**Fish Possessed from State and Federal Fish Hatcheries:** Fish can only be taken from a state or federal fish hatchery when given a written receipt for those fish or as allowed by posted signage.

**Head and Tail Removal:** While in transit it is illegal to remove heads or tails from any trout, kokanee, bass, tiger muskie, steelhead or salmon unless the following conditions are met: 1) the angler is ashore and done fishing for the day; 2) the fish is processed or packaged with the skin naturally attached to the flesh; 3) the fish must be processed or packaged in a manner that the number of fish harvested can be readily determined. Processed fish species listed above cannot be transported by boat.

**Holding Live Fish:** No permit is required to keep game fish alive that have legally been reduced to possession, in a live well, net or on a stringer while at the body of water from which they were taken. All fish must be killed or released prior to leaving the water body. However, anadromous salmon and steelhead must either be killed or released after landing.

**Private Fish Pond:** You are required to have a private pond permit from Fish and Game to own a private pond stocked with game fish. Contact your local Fish and Game office for a permit application.
If you harvest fish from a licensed private pond, you must have a signed receipt for those fish while in transit between the pond and place of consumption/use.

Proxy Statement for Fish Transport or Gift: You must have a proxy statement to transport fish for another person or accept as a gift any game fish. See page 7 for a proxy statement form. It must be signed by the taker, show the number and kind of fish, the date taken, the taker’s address, and fishing license number. No person may claim ownership of more fish than allowed by the possession limit.

Sale of Fish: Fish harvested by anglers cannot be bought or sold without a commercial license except as provided by Idaho code.

Shipment of Fish: No person shall ship legally harvested fish unless the package is marked on the outside with: the name, address and fishing license number of the person who caught the fish, the name and address of the person to whom the fish are being shipped with or sent to, and the number of fish, by species, contained in the package.

Transport between CommerciallyLicensed Fish Hatcheries: Fish can be transported between licensed commercial fish facilities without additional permits from Fish and Game.

Waste of Game Fish: It is illegal through carelessness, neglect or otherwise to allow or cause the waste of edible portions of any game fish including the fillets of fish and tails of crayfish.

Salvage of Fish
Fish salvage may be authorized when fish populations are threatened by water shortages or other causes. No salvage of fish from public waters will be allowed without Fish and Game authorization. When salvage is allowed, fish may be taken by snagging, spearing, archery, dip netting, seining, or by hand. Bag limits are typically removed. Use of toxic chemicals explosives, firearms, or electric current is prohibited. A valid fishing license is required. Anglers are reminded that access along canal banks and salvage fishing in most canals and ditches requires prior permission from irrigation companies.

Salmon and Steelhead Rules
Specific seasons and limits are subject to change by the Idaho Fish and Game Commission based on numbers of fish returning to Idaho from the ocean.

Seasons for anadromous (ocean-going) salmon are closed unless opened by special rule, which is published separately from general fishing rules. Look for separate rules pamphlets listing seasons and bag limits for anadromous salmon at vendors, Regional Offices, and on our website. Salmon rules are set annually by the Fish and Game Commission.

Transport and Introduction of Live Fish: It is illegal to transport or allow the release of any species of live fish (including crayfish and bullfrogs), or fish eggs, in the state of Idaho without a permit from the director of Fish and Game. If you illegally introduce fish into a water body without a permit, you could be held financially liable for restoration costs.

Fishing in Boundary Waters
Bear Lake between Idaho and Utah: The holder of a valid Idaho or Utah fishing license may fish all of Bear Lake except in areas closed to all fishing by the respective states. Anglers are subject to the rules and regulations of the state in which they are fishing.

Snake River between Idaho and Oregon or Washington: The holder of a valid Idaho fishing license may fish the Snake River where it forms the boundary between the states of Idaho and Oregon or Washington, subject to the fish and game laws of Idaho but may not fish from the shore including wading, and may not fish in sloughs or tributaries on the Oregon or Washington side. An Oregon or Washington license holder has the same rights and restrictions with reference to the Idaho side.

Any angler who fishes on the Snake River or any other water forming an Idaho boundary is entitled to have in possession only the limit allowed by one license regardless of the number of licenses in possession.

Releasing Fish
Releasing fish is a good way to help maintain healthy populations and quality fisheries where angling effort is high. Releasing fish is most effective when anglers strive to ensure that each fish caught and released has the maximum chance to survive after release.

You can do your part to increase fish survival by following these stress reducing practices:

- Use the proper size tackle to land the fish quickly, which can help minimize stress.
- Use barbless hooks to ease hook removal and minimize damage to the fish.
- Use of nets with non-abrasive materials will reduce loss of mucous and scales from the fish.
- Do not handle fish with dry hands.
- Do not squeeze the fish.
- Do not touch or hold fish by the gills, gill covers, or the eyes.
- Leave the fish in the water while removing the hook; holding fish upside down in the water often makes them easier to handle.
- If the hook is too deep to be easily removed, cut the leader. This will give the fish the best chance to survive.

Taking Photographs
Photographs of a trophy catch can provide priceless memories of a great fishing trip, but anglers should use care to take the photo responsibly. Here are things you can do to capture that special image and allow the fish to fight another day (remember – sturgeon can’t be removed from the water):
• Have the camera ready and the shot framed before removing the fish from the water.
• When lifting a fish from the water, wet your hands before touching the fish and support the fish with both hands as you gently lift it from the water.
• Strive to hold the fish over the water so if it struggles from your hands it will fall back in the water and not onto a hard surface such as a rock or a boat floor.
• Hold the fish out of the water only as long as it takes to take a picture.

**Reasons for Special Seasons**

Listed under “Special Rule Waters” for each region you will see a number of waters with season dates different from their regional general stream and lake seasons. While they add complexity to the rules, they are designed to protect fish populations during vulnerable periods. The protection is needed to maintain or restore fish populations and to provide a diversity of fishing opportunities. For example:

- **Seasonal stream closures**: Most often these are spring closures to protect spawning native fishes (e.g. Cutthroat Trout). Fall closures may be used in some locations to protect spawning Bull Trout and kokanee. The specific dates of seasonal closures may vary depending on the species and location. In general, these restrictions will apply where spawning fish are easily accessible to anglers, and where protection of spawners is important to conserve species or maintain populations of larger fish.
- **July 1 opener to harvest bass**: Designed to protect large bass during the vulnerable spring period and to reduce the overall annual harvest to provide a “quality” size structure — normally accompanied by other regulations which also restrict the size and number of fish harvested.
- **Closed to Fishing**: A last resort restriction in important spawning and nursery streams for species with critically low populations.

**Reasons for Special Size and Bag Limits**

Harvest restrictions help maintain the overall numbers and size of fish in a lake or stream, and also ensure “fair share” so every angler has a chance to catch or harvest fish. Restrictive harvest rules are sometimes used simply to provide a different type of fishing experience or to maximize the size of fish available.

Idaho Fish and Game manages recreational fisheries to provide a variety of experiences using different combinations of size, gear, and bag limits. The range of harvest rules includes:

- **General bag and size limits apply** in typical harvest oriented fishing waters without gear or bait restrictions. Many of these waters are stocked with harvestable-sized hatchery trout.
- **Wild trout management de-emphasizes angler harvest.** For this reason a reduced bag limit of two trout is used to maintain wild trout populations. Additional size limits, gear, or bait restrictions may apply.
- **Special size limits are used** where the goal is to catch more and larger fish by giving up some harvest opportunity. A bag limit of two fish (trout or bass) and various size limits such as a 14 or 16-inch minimum or a 12 to 16-inch protected range are common.
- **Trophy fish or large trout management may require more restrictive limits.** For example, this could include catch-and-release rules or a bag limit of two fish (for both trout and bass) combined with length restrictions. Gear or bait restrictions may apply.
- **Special Cutthroat Trout rules are implemented across most of the state to protect our state fish.** Cutthroat Trout are easily overfished, so various special rules are used to protect them from excess harvest. Many waters throughout the state have catch-and-release, restrictive bag or length limits, or other rules to protect Cutthroat Trout.
Navigable streams are defined as any stream which, in its natural high-water condition, will float logs or any other commercial or floatable commodity, or is capable of being navigated by oar or motor propelled small craft for pleasure or commercial purposes. Navigable streams are recognized as public transportation corridors, thus members of the public have the right to use the corridor, provided they enter and exit the corridor at a public right of way, and remain within the corridor. Many navigable streams flow through private property, thus it is important that anglers know their rights and responsibilities when fishing in navigable waters that flow through private property.

When fishing in navigable streams bordered by private property:

- You must stay within the normal high-water marks of the stream, unless you have landowner permission to get out on the bank, or have no other means of getting around an obstruction in the stream (such as a fence or diversion dam).
- When getting outside of the stream to go around an obstruction, take the shortest, most direct route around the obstruction to get back in the stream.
- Do not allow pets or children to trespass on adjacent private property, without landowner permission.
- You may enter and exit navigable streams at other public rights of way, such as county road bridges.
- **ASK FIRST!** Always get landowner permission before crossing private lands outside of a public right of way.
What to do if you catch a tagged fish

- Write down or photograph tag number(s).
  Some fish have 2 tags.
- Call hotline or report via IDFG website
- Provide additional information as prompted
- Some tags offer a cash reward. Simply cut or remove the tag whether you keep or release the fish. To receive the reward you MUST report the tag and mail it to:

  **Fish Tag Returns- IDFG**
  1414 E. Locust Lane
  Nampa, ID 83686

  **Thanks for your help!**

  Idaho Fish and Game uses information provided by fish tagging to help manage fisheries. By reporting a tag, you are helping to make fishing better throughout Idaho.

  Report tags to: [tag.idaho.gov](http://tag.idaho.gov)
  Hotline (toll free): 1-866-258-0338
The White Sturgeon is the largest freshwater fish in North America. To reach their maximum adult size of 8 to 10 feet or more, sturgeon must survive for many years. Unintentional deaths result in fewer fish living the 25-65 years of age necessary to reach large sizes. Research has found that baited hooks, fishing line and swivels, broken off by anglers, may be ingested by sturgeon, and in rare instances cause death. Because of this, IDFG adopted rules designed to reduce the amount of tackle lost by anglers (see diagram below) with the overarching goal of reducing unintentional sturgeon deaths. Specifically, these rules increase an angler’s chance of retrieving their hook, leader and swivel when snagged (in most instances the weight breaks off and the rig is retrieved). If the hook does break off, these rules will help increase the likelihood that the weight and hook separate, reducing the chance of “ghost gear”. In addition, the following tips were developed for sturgeon anglers to assist them in catching fish and releasing them successfully.

If You Catch a Sturgeon

- **Sturgeon must not be removed from the water and must be released upon landing.**
- Sturgeon can be rolled onto their backs in the water before removing the hook. This generally calms the fish down making it easier to remove the hook.
- Do not grasp a sturgeon by the gills. Gills are the lungs of a fish and can be easily damaged. If you need to keep a sturgeon in place, you can easily hold onto its lower lip while it is upside down.
- Do not mark, scar, or put a tail rope on sturgeon.
- If fishing from a boat and you snag the bottom, back over the snagged hook/weight and pull from different angles to try and dislodge them. This will increase your odds of retrieving your setup/rigging.
- If fishing from shore and you become snagged try repeatedly giving the line slack and then quickly pull back. If this does not work, retrieve as much line as possible and pull from different angles to try and dislodge your hook/weight.
- Do not leave discarded line on shore or in the water. It is a real hazard to both fish and wildlife.

**Sturgeon Fishing Setup/Rigging (also see diagram below)**

- When fishing for White Sturgeon, by rule (IDAPA 13.01.11) anglers are required to use barbless hooks, a sliding swivel device to secure a weight, and a lighter test line to secure a weight to the sliding swivel or other device.
- We recommend a minimum of 50 pound test monofilament line on your reel. This greatly reduces the chances of breaking off your main line either with a fish on or when snagged.

**Typical Sliding Sinker Setup**

- Barbless hooks **required**
- Lighter test line **required**
- Sliding swivel/device **required**
- Line - minimum 50 pound test monofilament
- To fishing pole

**IDAHO RECORD FISH - CATCH-AND-RELEASE RECORDS**

- Catch and Release Records are based only on the total length (snout to tip of tail) for fish legally released alive. Application forms require (1) a photo of the fish directly next to a ruler/tape or object of known verifiable length, and (2) a photo of the angler with the fish.
- Application forms and complete information on State Record Fish are available online: idfg.idaho.gov/fish/record

*species that can no longer be harvested*
Record Fish Program Guidelines*

Only fish caught in publicly accessible waters with legal fishing methods during an open season are eligible for State Records. All applicants must have a valid Idaho fishing license at the time the fish was caught. No records will be awarded for fish caught during salvage seasons or at private pay-to-fish facilities. Catch/release records must be released. See tips on safely releasing fish in this booklet!

- Catch/release White Sturgeon records (Catch and Release only) must be broken by a minimum of 2 inches. Catch/Release records for all other species must be broken by a minimum of ½ inch.
- All applications must be submitted within 30 days of the catch date.

*For complete rules and more information about submitting a record fish application, see the IDFG website

How to Apply For a Record

Complete program information and the Record Fish Application form are available online at: idfg.idaho.gov/fish/record

Certified Weight Records applications need:

- A receipt from the certified scale documenting the weight (typically be found at grocery stores or US Post Offices), verification of species from an IDFG office.
- At least one photo of the fish and a witness to the weight.

Catch and Release Record applications need:

- Total length - from the tip of the snout to the end of the tail. Sturgeon should be measured upside down along the belly from the snout to tip of the upper lobe of the tail.
- Salmon, Steelhead and White Sturgeon must be measured and photographed in the water.
- Photos: (1) of the fish directly next to a ruler/tape measure or object of known verifiable length and (2) a photo of the angler with the fish.
- At least one witness to the measurement and release.
