STATE AND FEDERAL REGULATIONS FOR MIGRATORY BIRD BAITING

As a hunter or land manager, it is your responsibility to know and obey all Federal and State laws that govern the sport. The following information summarizes state and federal migratory bird baiting regulations. Additional information about federal baiting regulations is described in the Summary of Federal Regulations at <https://idfg.idaho.gov/hunt/migratory/bait>.

WHAT IS BAITING?

Baiting is the direct or indirect placing, exposing, depositing, distributing, or scattering of salt, grain, or other feed that could lure or attract migratory birds to, on, or over any areas where hunters are attempting to take them. A baited area is any area on which salt, grain, or other feed has been placed, exposed, deposited, distributed, or scattered, if that salt, grain, or feed could serve as a lure or attraction for migratory birds.

HOW LONG IS AN AREA BAITED?

A baited area remains off limits to hunting for 10 days after all salt, grain, or other feed has been completely removed.

HOW CLOSE TO BAIT CAN YOU HUNT WITHOUT BREAKING THE LAW?

There is no set distance. The law prohibits hunting if bait is present that could lure or attract birds to, on, or over areas where hunters are attempting to take them. Distance will vary depending on the circumstances and such factors as topography, weather, and waterfowl flight patterns. Therefore, this question can only be answered on a case-by-case basis.

WHAT IS ILLEGAL?

Examples of areas where you cannot hunt migratory birds include:

- Unharvested crops that have been trampled by livestock or subjected to other types of manipulations that distribute, scatter, or expose grain.
- Croplands where a crop has been harvested and the removed grain is redistributed or “added back” onto the area where grown.
- Areas where grain is present and stored, such as grain elevators and grain bins or areas where grain is present for the purpose of feeding livestock.
- Freshly planted wildlife food plots that contain exposed grain.
- These examples do not represent an all-inclusive list of migratory bird baiting violations.

WHAT IS LEGAL?

You can hunt migratory birds on, over, or from:

- Standing crops or flooded standing crops, including aquatic plants.
- Standing, flooded, or manipulated natural vegetation.
- Flooded harvested croplands.
- Lands where grains have been scattered solely as the result of a normal agricultural planting, harvesting, or post-harvest manipulation.
- Lands where top-sown seeds have been scattered solely as the result of a normal agricultural planting, or a planting for agricultural soil erosion control or post-mining land reclamation.

THE HUNTER'S RESPONSIBILITY

As a hunter, you are responsible for determining whether your proposed hunting area is baited.

Before hunting, you should:

- Familiarize yourself with Federal and State migratory bird hunting regulations.
- Ask the landowner and your hunting partners if the area has been baited and inspect the area for the presence of bait. Suspect the presence of bait if you see waterfowl feeding in a particular area in unusually large concentrations or displaying a lack of caution.
- Look for grain or other feed in the water, along the shore, and on the field. Pay particular attention to the presence of spilled grain on harvested fields and seeds planted by means of top sowing.
- Confirm that scattered seeds or grains on agricultural lands are present solely as the result of a normal agricultural planting, normal agricultural harvesting, normal agricultural post-harvest manipulation, or normal soil stabilization practice by consulting the Cooperative Extension Service.
- Abandon the hunting site if you find grain or feed in an area and are uncertain about why it is there.

Navigable streams are defined as any stream which, in its natural high-water condition, will float logs or any other commercial or floatable commodity, or is capable of being navigated by oar or motor propelled small craft for pleasure or commercial purposes. Navigable streams are recognized as public transportation corridors, thus members of the public have the right to use the corridor, provided they enter and exit the corridor at a public right of way, and remain within the corridor. Many navigable streams flow through private property, thus it is important that anglers know their rights and responsibilities when fishing in navigable waters that flow through private property.

When fishing in navigable streams bordered by private property:

- You must stay within the normal high-water marks of the stream, unless you have landowner permission to get out on the bank, or have no other means of getting around an obstruction in the stream (such as a fence or diversion dam).
- When getting outside of the stream to go around an obstruction, take the shortest, most direct route around the obstruction to get back in the stream.
- Do not allow pets or children to trespass on adjacent private property, without landowner permission.
- You may enter and exit navigable streams at other public rights of way, such as county road bridges.
- **ASK FIRST!** Always get landowner written permission or other lawful permission before crossing private lands outside of a public right of way.
