Adult Chinook Salmon are 24 or more inches in length.

Jack Chinook Salmon are less than 24 inches in length.

Mainstem Clearwater, North Fork Clearwater, Middle Fork Clearwater and South Fork Clearwater:

- **Daily Bag Limit:** four (4) salmon per day, only one (1) may be an adult.
- **Possession Limit:** 12 salmon of which no more than three (3) may be adults.

Lower Salmon and Little Salmon rivers:

- **Daily Bag Limit:** four (4) salmon per day, only two (2) may be adults.

“Possession limit” shall apply to salmon while in the field or being transported to the final place of consumption or storage.

Anglers may not fish for Chinook Salmon in any river section while in possession of Chinook Salmon that match or exceed the bag or possession limits for that section. (For example, an angler may not fish in the Mainstem Clearwater, North Fork Clearwater or Middle Fork Clearwater if they have harvested one or more adult salmon in another river section that day.)

Anglers must cease fishing for all Chinook Salmon (including jacks) once they have retained their daily, possession or season limit of adult Chinook Salmon or their overall daily, possession or season limit of Chinook Salmon of any size, whichever comes first.

Releasing Fish

Any salmon that is landed but not reduced to possession must be released. Anglers should strive to minimize handling and stress on each fish caught and released.

Methods of Take

Barbless Hook

Up to 3 points
on one shank.

Single-Pointed Hook

One point on one shank

Barbless hook

- A** It is unlawful to use any hook larger than 5/8 inch measured from the point of the hook to the shank.
- B** Only barbless hooks may be used when fishing for salmon. Bending the barb(s) down to the shank of a single, double, or treble hook will meet this requirement.
- C** Only single point barbless hooks are allowed while fishing for salmon in the South Fork Clearwater River.

Harvest Rules

- A** Hatchery Chinook Salmon may be kept if the adipose fin has been clipped as evidenced by a healed scar.

- B** Chinook salmon with an unclipped adipose fin **MUST** be released.

- C** No person shall have in the field or in transit a hatchery-produced adult anadromous salmon that has been processed by removing the head and tail unless the following conditions are met:
 1. the fish has been recorded on the taker's salmon permit;
 2. the fish is processed and packaged with the skin naturally attached to the flesh including a portion with a healed, clipped, adipose fin scar; and
 3. it must be packaged in a manner that the number of fish harvested can readily be determined. No person shall process salmon until they are ashore and done fishing for the day. No person shall transport processed salmon via boat. Jack salmon may not be processed while in the field or in transit. Any processed salmon count towards an angler's possession limit while in the field or in transit.
- D** All salmon that are hooked, landed and reduced to possession must be killed immediately after landing and shall be counted in the limits of the person hooking the fish.

Permit Validation

When an adult Chinook Salmon has been hooked, landed and reduced to possession, the angler hooking the fish must immediately:

- A** Cut out and completely remove one numbered notch from the permit; and
- B** Look up the location code number from the list below and write it in the space provided; and
- C** Enter in the space provided, the month and day fish was harvested.

Note:

- When a salmon is released unharmed, as in catch-and-release fishing, the angler is not required to make an entry on the permit.
- Anglers may retain jack salmon less than 24 inches in length as part of their bag and possession limit but they are not required to record them on their permit.

For example, a salmon equal to or greater than 24 inches in length kept from the South Fork Clearwater River on June 1 would be entered as:
